EXPERIENCE

Reach Beyond Marketing | Branford, CT
Oct 2016 - Present

Responsible for updating the web development workflow to include modern tools such as version control through Git and modular CSS through SASS. Created reusable templates based on existing designs in order to accelerate the development process.

Built and maintained websites through WordPress designed by our in-house design team and spec'd out by the lead developer.

Independent Software's A100 Program | New Haven, CT
June 2016 - Sept 2016

Worked with a team of 5 developers to create an application usable by the owner to receive funding. Using Meteor, a full-stack javascript framework, the team was able to work as a cohesive unit while working on individual portions of the application.

InterTech Media, LLC | Stamford, CT
May 2014 - July 2016

Worked as a liaison between clients and the development team to ensure that the customer's needs were met throughout the design and development process of their website.

Built and maintained WordPress themes based on a spec sheet provided by the client.

PREVIOUS WORK

HireSPD

An E-Commerce website that allows users to hire police officers for private events. Site was hardened with extra security features like two-factor authentication and geofencing.

Project: Xavier

An recruitment platform catered toward software developers and recruiters. Developers could showcase specific projects from their Git repositories, and recruiters could use built-in filters to search through potential job candidates.
